

## PROPOSES PULP WOOD SURVEY

### Senator Watson Would Aid Building Up of News Print Paper Industry.

Washington, D. C., Aug. 22.—As a step toward conserving the decreasing supply of American pulp wood used in the manufacture of news print paper, senator Watson, Republican, in a bill today introduced a resolution authorizing the secretary of agriculture to make survey of the nation's available pulp wood timber supply. The sum of \$100,000 is asked to carry on the survey and investigation.

"Two-thirds of the news print paper used by American newspapers," senator Watson said, "is imported or is manufactured from wood or pulp imported from Canada. One-third is made in the United States. The former proportion is steadily increasing, the latter is steadily decreasing."

"Nearly all of the American news print manufacturing industry is located in the northeastern states—half of it in New York," the senator continued. "But in the Pacific northwest—Washington, Oregon and part of California—and the inland empire of northwestern Montana and northern Idaho are great forests that have been no more than touched by the few pulp mills to that section of the country."

The senator told the senate that in Alaska are enormous areas of forest, the annual growth of which would supply pulp for half of the news print paper used in the United States, but no pulp mills are there.

**Declares Industry Important.**  
The importance of a permanent domestic news print industry is emphasized by senator Watson, who recommended that the forest service of the department of agriculture be authorized to make a survey of the American newspaper industry from becoming totally dependent upon a foreign supply. To stimulate the forest service to make the following governmental policy should be worked out. An immediate and adequate governmental survey of American resources in this field.

Immediate steps to bring about protection of forests and the conservation of forests in the pulp producing regions to the end that the future of the pulp industry will be assured, and eventually will be no more than equal to the growth. Development as soon as practicable of the industry in the northwest and in Alaska.

## HEY—FELLAS!

**Man Dyeing at No. 701  
Texas Street**

We wish to announce that we have just employed a textile chemist who has had several years experience in the dyeing and especially in the dyeing industry. We are in position to match any color we undertake and guarantee same. But will not guarantee the fabric. We have given our dye some test work as to ascertain his ability before we notify the public, and have found him equal to the occasion. Therefore we are in position to back our slogan:

"El Paso's Finest Cleaners"

## RENT HOUSES STILL SCARCE

### Real Estate Men Say Business Good; Many Persons Buying Homes.

El Paso realtors report business during the past week as good, with a particularly large number of dealings in small homes. There were several trades in farm lands, both up and down the valley made during the week, although no large transaction of this kind was made.

Rent houses continue scarce and several dealers report that they have none at all listed. Apartments, both furnished and unfurnished, are scarce and eagerly sought.

**RABBI FAVORS MONUMENT IN HONOR OF SOLDIERS**

"El Paso must not forget and go to sleep on the movement for a suitable memorial for its soldiers who helped win the war, a permanent monument such as the memorial park will be," said Rabbi Martin Zilinski at the luncheon of the El Paso Hebrew Congregation, at the Sheldon, Friday.

The memorial park must be made real and carried out, not only by the present city administration, but by future administrations. Every citizen at El Paso should give the greatest effort through all local organizations to get the park assured.

Horace B. Stevens said: "El Paso's water supply is certainly inadequate for the future, and no source of greater supply is found nearby except in the Rio Grande."

"Laundries are as necessary as bakeries," said P. B. Fletcher. "All family washing in future will be done by the big public plants. The old hagbush of strong chemicals used by laundries is being displaced by modern methods and open-minded investigation. All laundry men here are anxious that families should fully understand how their washing is taken care of."

Round table talks were made by W. R. Shutes, James A. Ford, Gus Eminger, A. R. Lockhart, J. L. Foster, Horace B. Stevens, J. J. Rehder, Julian H. Hines, David Moore and D. E. Dubinsky.

**Letters To The Herald**

**THE LEAGUE OF NATIONS.**  
New York City, Aug. 22.

Editor El Paso Herald:

A senate bill supporting to declare how the treaty should be interpreted is a mere scrap of paper, which the federal supreme court holds to be "absolutely without legal significance" (133 U. S. 139).

No reservation by the United States senate since the League of Nations was created, or of the United States' reserved right to withdraw from the league, would be effective unless at the time of the reservation, the league was in existence.

Such reservation might be as worthless and ineffectual as the like reservation of the alleged right of Virginia, New York and Rhode Island to secede from the federal union, contained in the respective ratifications of the United States constitution by those states, was held to be during the civil war. By the sword of war and later by the decision of the federal supreme court, it was decided that, notwithstanding express reservations in their ratifications, the states were bound by the constitution.

That the powers of government may be resumed by the people, whenever it shall become necessary to their happiness.
